Document Versioning

Version	Change Date	Author	Change Comment
1.0	1/19/2015	Eric Brooks	Document creation
1.1	2/2/2015	Kai Thao	Updated max values on strings
1.1	2/2/2015	Kai Thao	Missed a 5 for one of the max values
1.2	2/12/2015	Kai Thao	Removed arrival date

Overview

This documentation is to provide an overview of the BHTP Partner API. This API provides a mechanism in which external partners can get quotes and purchase policies in an automated and real-time format. Due to the quick response time of this API, partners have the ability to integrate this API into their current purchase path for instant feedback to their customers on the success or failure of the quote or purchase process.

The BHTP API provides an easy authentication mechanism for safe and secure transfer of requests. It also has the ability to provide robust messaging back to the caller for items like errors, warnings and informational messages.

Property Definitions and Validations

Field Name	Data Type	Description	Validations
Policy			
AgencyCode	String	Code assigned to agency by BHTP	ANNNNN, ex: A1234
AgentCode	string	Code assigned to agent by BHTP	AANNNNN, ex: AB1234
DepartureDate	string	The trip's date of departure	MM/dd/yyyy
DestinationCity	string	The city in which a majority of the trip will be spent	Max 50 characters
DestinationState	string	The state in which a majority of the trip will be spent	ISO2 code, Max 2 characters
DestinationCountry	string	The country in which a majority of the trip will be spent	ISO2 code, Max 2 characters
PackageName	string	The name of the BHTP product package being sold	"AirCare", "ExactCare"
ReturnDate	string	The trip's date of return	MM/dd/yyyy
TripCost	number	The cost of the trip in USD	No more than 100,000.00
TripDepositDate	string	The date of the initial deposit for the trip	MM/dd/yyyy, or null
IsQuickQuote	boolean	Indicator whether a quote runs eligibility or not	true/false
CarRentalCompany	string	Name of the car rental company	Max 255 characters
RentalCarPickupDate	string	Date insured picked up rental car	MM/dd/yyyy
RentalCarReturnDate	string	Date insured returned rental car	MM/dd/yyyy
CruiseLine	string	Name of the trip's cruise line	Max 255
TourOperator	string	Name of tour operator for trip	Max 255
Hotel	string	Name of hotel where insured spent a majority of their time	Max 255
RentalCompany	string	The company name of the rental company of any rental equipment	Max 225
Primary Traveler			
FirstName	string	First name of primary traveler	Max 40 characters
LastName	string	Last name of primary traveler	Max 80 characters
Address1	String	Street or P.O. Box of primary traveler	Max 100 characters
City	String	City of residence of primary traveler	Max 100 characters
StateOrProvince	string	State of residence of primary traveler	ISO2 code, Max 2 characters

PostalCode	string	Postal code of primary traveler	Real postal code in the World
Phonenumber	String	Phone number of primary traveler	NNN-NNN-NNNN, ex: 715-554-12345
Email	String	Email of primary traveler	Properly formatted email
Gender	String	Gender of primary traveler	null, "Male", "Female"
Birthdate	String	Birthdate of primary traveler	MM/dd/yyyy
IsPrimary	boolean	Indicates if the traveler is the primary traveler	true/false
Additional Travelers			
FirstName	string	First name of additional traveler	Max 40 characters
LastName	string	Last name of additional traveler	Max 80 characters
Birthdate	string	Birthdate of additional traveler	MM/dd/yyyy
Email	string	Email of additional traveler	
Gender	string	Gender of additional traveler	null, "Male", "Female"
Flights			
FlightNumber	string	Number of the flight indicated by the airline carrier	Numeric
AirlineCode (IATA)	string	IATA code for the airline of the flight	Valid IATA code http://www.iata.org/services/Pages/codes.aspx
DepartureAirportCode(IATA)	string	IATA code for the airport for which the traveler is departing	Valid IATA code
ArrivalAirportCode (IATA)	String	IATA code for the airport for which the traveler is arriving at	Valid IATA code
DepartureDate	String	Date in which the traveler is departing on their flight, local time of the airport	MM/dd/yyyy
ArrivalDate	string	Date in which the traveler is arriving on their flight, local time of the airport	MM/dd/yyyy
Coverages (ExactCare Only)			
RatingId	String	The BHTP id for the coverage	"FAU", "CCRC", "EEU", "MESU"
CoverageLimit	Number	The benefit limit of an individual coverage	Limits are [100000, 200000, 300000, 400000, 500000] for AD&D coverage
Payment Information			
CardNumber	String	The customer's credit card number	Valid against Luhn algorithm. http://en.wikipedia.org/wiki/Luhn_algorithm
ExpirationDate	String	The expiration date of the	MM/yy

		customer's credit card	
CardCode	String	The security code of the customer's credit card number	AAAA or AAA ex: 123 or 1234
FirstName	String	The first name indicated on the customer's credit card	Max 40 characters
LastName	String	The last name indicated on the customer's credit card	Max 80 characters
Address	String	The street or P.O. Box associated to the customer's credit card	Max 100 characters
City	String	The city of residence associated to the customer's credit card	Max 100 characters
State	String	The state of residence associated to the customer's credit card	Max 100 characters
Zip	String	The zip code associated to the customer's credit card	Real postal code in the World
PaymentMethod	string	The method of payment for the policy purchase	"CreditCard", "Invoice" (only approved merchants may use invoice)

API Environments

Sandbox

All partner integration must be tested and approved from within the sandbox environment. Until that approval is earned. Production credentials will not be provided to the partner.

The sandbox environment can be found here: <https://sandbox-api.bhttp.com>

Login endpoint: <https://sandbox-api.bhttp.com/v1/Auth/Login>

Quote endpoint: <https://sandbox-api.bhttp.com/v1/quote>

Purchase endpoint: <https://sandbox-api.bhttp.com/v1/purchase>

Eligibility endpoint: <https://sandbox-api.bhttp.com/v1/Eligibility>

Production

Production credentials will be provided upon the completion of integration testing within the sandbox environment. All tested must be completed in the sandbox environment.

The production environment can be found here: <https://api.bhttp.com>

Login endpoint: <https://api.bhttp.com/v1/Auth/Login>

Quote endpoint: <https://api.bhttp.com/v1/quote>

Purchase endpoint: <https://api.bhttp.com/v1/purchase>

Eligibility endpoint: <https://api.bhttp.com/v1/Eligibility>
